

Air Permitting & Compliance

Air permits can be one of the most cumbersome types of environmental permits to obtain. At Harbor, we stress the importance of involving EHS personnel in the engineering and planning process early, whether it is through consultants or on-site staff. Our air permitting staff are experienced in the nuances of state and federal air regulations which allows us to identify opportunities for flexible, industry-friendly permits.

- "Greenfield" Project Permitting
- Expansion Permitting (Minor/Major Source)
- General Permits
- NSPS/NESHAP Applicability Determinations
- Risk Management Plans
- Air Dispersion Modeling
- Management System Development
- Regulatory Inspection Assistance
- Stack Testing Assistance
- Greenhouse Gas Reporting
- Compliance Recordkeeping (on- and off-site assistance)
