

Environmental Site Assessments

Harbor deploys experienced environmental professionals to perform environmental site assessments so that the client gets an in-depth perspective on activities and impacts at the site. We work with clients to understand and evaluate risks posed by these properties to their business operations and identify opportunities for purchasing reduced value properties.

- Preliminary Site Selection Evaluations
- Phase I Environmental Site Assessments (ASTM 1527-13)
- Phase II Environmental Site Assessments (ASTM 1903-11)
- Limited Subsurface Investigations
- Environmental Constraints Mapping
- Asbestos/Lead Surveys
- Demolition/Renovation Assistance
- Permitting Evaluation for New Business and Existing Business Risk
- Due Diligence Program Development
