

Wastewater

Harbor is adept at all aspects of wastewater treatment management from design and construction of industrial and municipal wastewater treatment facilities to comprehensive retrofit, repair, and operations and maintenance services. Our solutions focus on specific client needs. Unlike some firms, we are not locked into a set technology or approach. We identify the best technology and customize options to address individual client wastewater needs.

- Sewer System Evaluation Surveys (SSES)
- Master Plan Development, including Feasibility Studies
- Wastewater Treatment Plant Design
- Regulatory Assistance – Permitting
- Gravity and Low Pressure Pumped Collection Systems
- Sewer Lift Station Design
- Sewer Force Main Design
- Industrial Pre-Treatment
- Rehabilitation & Trenchless Methods
