

Energy Audits

Energy Audits

Harbor is here to help building owners by evaluating their building's energy usage and advising owners on how they can save energy. Whether it is a new construction project, major building renovation, commercial interior, or existing building, Harbor will help you build green and operate smart.

- Level I: Site Assessment/Preliminary Audit
- Level II: Energy Survey and Engineering Analysis Audit
- Energy and Cost Analysis
- Electrical Assessment
- Motor, Drives, and HVAC Assessment
- Boiler and Thermal System Assessment
- Building Envelope Assessment
