

Streets and Roadways

Safe and efficient roads are vital in connecting people and places, spurring economic development and growth across the nation. Adequately maintaining our road infrastructure is essential to preserving and enhancing those benefits. Harbor is well-equipped to address any task related to roadway design, including interchange and intersection geometrics, utility relocations, signage and marking, structural/bridge design, retaining walls, and related features.

- Arterial, Collector, and Local Streets Design
- Street Reconstruction/Overlays Design
- Bridge and Culvert Design
- Sidewalk Design
